

SAI VENKATA NAGENDRA ABHAY RAJ GURRAM

Jersey City, NJ | 815-618-1777 | abhayrajgurram13@gmail.com | linkedin.com/in/abhaygurram | github.com/Abhayraj1307

SUMMARY

Machine Learning graduate student specializing in predictive modeling, exploratory data analysis (EDA), feature engineering, and model evaluation. Built regression, classification, and NLP systems with measurable performance gains (82% validation accuracy, 12% improvement over baseline). Strong in Python and SQL with end-to-end experience from data preprocessing to deployment.

EDUCATION

Stevens Institute of Technology — M.S. Business Analytics & Artificial Intelligence (Expected May 2026)

Relevant Coursework: Machine Learning, Experimental Design, Optimization, Multivariate Analysis, Data Management, Web Mining

GITAM University — Bachelor of Pharmacy (2019–2023)

TECHNICAL SKILLS

Programming: Python, SQL, R | ML: Regression, Classification, Clustering, XGBoost, LightGBM, scikit-learn | NLP: BERT, Transformers, spaCy | Data: EDA, Feature Engineering, SHAP, Cross-Validation | Tools: Pandas, NumPy, Streamlit, Tableau, Power BI, Git | Cloud: AWS SageMaker, GCP Cloud Run

MACHINE LEARNING PROJECTS

- F1 Race Strategy Prediction Model: Engineered features from lap-level race data and trained XGBoost classification model achieving ~82% validation accuracy; applied SHAP for interpretability.
- Twitter Sentiment Classification with BERT: Fine-tuned BERT on tweet dataset, improving accuracy by ~12% over baseline logistic regression; evaluated using precision, recall, F1-score; deployed via Streamlit.
- LLM-Based Incident Classification System: Built NLP pipeline to process semi-structured incident reports and classify root causes; implemented confidence scoring for decision support.

INDUSTRY EXPERIENCE

Laurus Labs Ltd. — Quality Assurance Intern (May 2022 – June 2022)

- Analyzed structured production and stability datasets for compliance verification.
- Supported data validation workflows and improved audit documentation clarity.

- Reviewed deviation reports and standardized data review processes.
