PROFESSIONAL SUMMARY

Data & AI Infrastructure graduate student specializing in building scalable data pipelines, automating data ingestion and transformation workflows, and supporting machine learning infrastructure. Experienced in Python and SQL-based development for large-scale datasets, cloud environments, and production-ready analytics systems. Strong interest in supply chain analytics, operational optimization, and AI-driven decision support systems.

TECHNICAL SKILLS

Programming: Python (Advanced), SQL

Data Engineering: Data Pipelines, ETL, Data Ingestion Automation, Data Transformation, Data Validation

Cloud Platforms: AWS (SageMaker), GCP Cloud Run, Exposure to Azure & Snowflake Concepts

Machine Learning Infrastructure: Feature Engineering, Model Deployment Support, ML Workflow Automation

Databases: Relational Databases, Query Optimization, Large-Scale Data Processing

Tools: Pandas, NumPy, scikit-learn, XGBoost, Git, Streamlit

DATA & AI ENGINEERING PROJECT EXPERIENCE

- 1 Large-Scale Data Pipeline for Predictive Modeling — Built Python + SQL workflows to ingest, transform, and validate high-volume datasets; automated feature generation and supported ML model training infrastructure.
- 2 AI-Driven Data Integration Tool — Developed modular Python application integrating multi-source data via APIs; structured datasets for downstream ML workflows and automated validation checks.
- 3 Operational Performance Modeling System — Designed scalable ETL pipelines for telemetry-style data; implemented cross-validation and performance optimization for reliable model outputs.

INDUSTRY EXPERIENCE

Laurus Labs Ltd. — Quality Assurance Intern (Jan 2022 – June 2022)

- Executed advanced SQL queries and managed structured data in relational databases
- Performed data validation and integrity checks across large operational datasets
- Improved documentation and data management processes supporting enterprise workflows

EDUCATION

Stevens Institute of Technology — M.S. Business Analytics & Artificial Intelligence (Expected May 2026)
