MACHINE LEARNING ENGINEERING INTERN

Detail-oriented Machine Learning student with strong foundations in supervised and unsupervised learning, data preprocessing, feature engineering, and model evaluation. Experienced in building and validating machine learning models using Python and scikit-learn. Passionate about data-driven problem solving and collaborative engineering.

TECHNICAL SKILLS

- Programming: Python, SQL
- Libraries: Pandas, NumPy, Scikit-learn, TensorFlow (basic), PyTorch (basic)
- Machine Learning: Supervised Learning, Unsupervised Learning, Cross-Validation, Model Evaluation
- Data Processing: Data Cleaning, Feature Engineering, Data Transformation
- Model Metrics: Accuracy, Precision, Recall, F1-Score, Confusion Matrix
- Tools: Git, Jupyter Notebook, Automation Scripting

EDUCATION

Master's in Business Intelligence & Analytics – Stevens Institute of Technology (GPA: 3.3+)

Relevant Coursework: Machine Learning, Statistical Modeling, Data Mining, Data Engineering, Optimization

PROJECT EXPERIENCE

- **End-to-End Machine Learning Pipeline** – Performed data cleaning, preprocessing, and feature engineering using Pandas and NumPy.
- Trained and evaluated supervised models (Logistic Regression, Random Forest, Gradient Boosting) using scikit-learn.
- Applied cross-validation techniques to ensure generalization and reliability.
- Measured model performance using accuracy, precision, recall, and F1-score.
- **Predictive Modeling Project** – Built classification and regression models on structured datasets.
- Conducted exploratory data analysis (EDA) and statistical feature selection.
- Tuned hyperparameters using GridSearchCV and validated model stability.
- **Data Automation & Scripting** – Developed Python scripts to automate preprocessing workflows and data validation.
- Created reusable transformation pipelines to support machine learning tasks.

EXPERIENCE

Quality Assurance Intern – Laurus Labs Ltd. (Jan 2022 – June 2022)

- Worked with structured enterprise datasets ensuring accuracy and completeness.
- Conducted data validation and root cause analysis on inconsistencies.

- Collaborated with cross-functional teams to improve documentation and workflow reliability.
