DATA SCIENCE INTERN – TRUST & SAFETY / RISK ANALYTICS

Data Science graduate student with strong foundations in statistical analysis, regression modeling, A/B testing, and data-driven risk monitoring. Experienced in SQL and Python for data cleaning, preprocessing, feature engineering, and quantitative analysis. Skilled in building KPI monitoring systems, anomaly detection workflows, and evaluation frameworks to support strategic decision-making.

TECHNICAL SKILLS

- Programming: Python, SQL
- Data Analysis: Pandas, NumPy, Scikit-learn
- Statistical Methods: Regression Analysis, Hypothesis Testing, A/B Testing, Causal Inference (foundational)
- Machine Learning: Supervised & Unsupervised Learning, Model Evaluation, Cross-Validation
- Risk & Monitoring: KPI Design, Anomaly Detection, Data Validation
- Visualization: Data Reporting, Dashboard Development (Jupyter/Matplotlib)

EDUCATION

Master's in Business Intelligence & Analytics – Stevens Institute of Technology

Relevant Coursework: Statistical Modeling, Machine Learning, Data Mining, Experimental Design, Optimization

PROJECT EXPERIENCE

- **Risk Monitoring & KPI Analysis Project** – Designed core indicator metrics to evaluate model performance and system stability.
- Performed data cleaning, preprocessing, and feature engineering on structured datasets.
- Built regression models to analyze risk factors and identify key predictors.
- Applied hypothesis testing and A/B testing methodology to evaluate strategy effectiveness.
- Generated data visualization reports and structured experiment analysis documentation.
- **End-to-End Data Analysis Pipeline** – Developed SQL queries to extract and aggregate datasets for analysis.
- Conducted exploratory data analysis (EDA) to identify anomalies and data inconsistencies.
- Trained and validated classification models using cross-validation techniques.
- Presented analytical insights and recommendations for business decision-making.

EXPERIENCE

Quality Assurance Intern – Laurus Labs Ltd. (Jan 2022 – June 2022)

- Worked with structured enterprise datasets ensuring data accuracy, completeness, and compliance.
- Performed data validation and anomaly identification to improve reliability of reporting systems.

- Collaborated with cross-functional teams to support process optimization and documentation.
