PROFESSIONAL SUMMARY

Recent Master's graduate in Business Analytics and Artificial Intelligence with hands-on experience in data analysis, SQL, Python, data validation, reporting, dashboard development, data quality assurance, and end-to-end analytics workflows. Skilled in Python, SQL, Excel, Pandas, NumPy, Power BI, Tableau, Scikit-learn, Git, and documentation, with exposure to ETL/ELT concepts, relational databases, cloud data platforms, Databricks, PySpark, Lakehouse architecture, and CI/CD fundamentals. Strong interest in data engineering modernization, cloud-first analytics, governed datasets, data pipelines, Power BI reporting, and AI-assisted productivity tools.

TECHNICAL SKILLS

Data Analysis & Querying: SQL, Python, Excel, Pandas, NumPy, Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis, Structured Data, Unstructured Data

Data Engineering & ETL: ETL, ELT, Data Pipelines, Data Integrations, Data Ingestion, Data Transformation, Data Modeling, Relational Database Concepts, Lakehouse Exposure, Data Warehouse Exposure

Cloud & Data Platforms: Databricks Exposure, PySpark Exposure, Azure Databricks Awareness, Databricks Dashboards Exposure, Unity Catalog Awareness, AWS Cloud Practitioner

BI & Reporting: Power BI, Tableau, Dashboard Development, KPI Reporting, Reporting Models, Data Visualization, Business Reporting, Stakeholder Reporting

Data Quality & Governance: Data Quality Assurance, Data Validation Techniques, Data Integrity Monitoring, Metadata Documentation, Data Governance Awareness, Data Classification Awareness, Compliance Support

Engineering Workflow: Git, GitHub-Based Workflows, Branching, Pull Requests, Code Reviews, CI/CD Fundamentals, Modular Code, Documentation, Monitoring Awareness, Debugging

AI & ML: Scikit-learn, Machine Learning, Clustering, Recommendation Systems, NLP, HuggingFace Transformers, LangChain, OpenAI API, Pinecone, AI-Assisted Tools

PROJECT EXPERIENCE

Cloud Data Modernization & Power BI Reporting Case Study

- Designed an end-to-end data workflow concept covering ingestion, transformation, data modeling, validation, and reporting for business users.
- Built SQL-style relational data models and reporting schemas to simplify data access, improve data consistency, and support stakeholder-facing dashboards.
- Created Power BI dashboard concepts for KPI tracking, operational reporting, trend analysis, and data-driven decision support.
- Defined data validation routines to identify missing values, duplicate records, inconsistent fields, invalid dates, and reporting anomalies.
- Documented data sources, pipeline logic, metric definitions, reporting assumptions, and dashboard usage notes to improve discoverability and trustworthiness.
- Applied GitHub workflow concepts including branching, pull requests, code reviews, modular code structure, and CI/CD fundamentals for analytics project organization.

Formula 1 Strategy Analysis using Clustering

- Extracted and analyzed 3 seasons of Formula 1 race data using the FastF1 library to identify operational patterns across tire strategy, pit stops, and race performance.

- Built Python-based workflows for data ingestion, cleaning, preprocessing, feature engineering, exploratory analysis, and structured reporting.
- Applied K-Means clustering to segment race outcomes into 3 strategy profiles and identify performance trade-offs across teams.
- Created analytical dashboards and visual outputs to communicate KPI trends, performance patterns, and operational insights to non-technical audiences.
- Demonstrated end-to-end analytics workflow from raw data extraction through transformation, modeling, visualization, and interpretation.

Netflix Recommendation System Optimization

- Built a collaborative filtering recommendation model using a movie ratings dataset to analyze user-item behavior and improve recommendation relevance.
- Performed data cleaning, exploratory data analysis, feature engineering, model evaluation, and reporting using Python, Pandas, NumPy, and Scikit-learn.
- Developed dashboard-style reporting outputs to summarize engagement patterns, recommendation performance, and business insights.
- Translated raw interaction data into structured analytical findings supporting product analytics, reporting, and decision-making use cases.

NovaMind – Multi-Agent AI Decision Intelligence Platform

- Built a multi-agent AI platform using Python, LangChain, and OpenAI API to analyze incidents and generate structured decision-support reports.
- Designed workflows for data ingestion, evidence extraction, root-cause reasoning, issue categorization, and report generation.
- Created structured outputs to improve documentation quality, reporting consistency, data accessibility, and stakeholder-ready insight delivery.
- Used AI-assisted tools and modular Python workflows to improve productivity, analysis speed, and repeatability of reporting outputs.

Rationale Agent – AI Incident Intelligence System

- Developed an AI-assisted IT operations tool using Python and LangChain for incident reasoning, diagnostic reporting, and structured analysis.
- Built workflows to parse unstructured incident information, recognize patterns, identify gaps, and produce human-readable reports.
- Focused on improving data accessibility, documentation clarity, analytical trustworthiness, and operational issue resolution.

Twitter Sentiment Analysis using BERT

- Fine-tuned a BERT Transformer model on 1.6M tweets for sentiment classification, achieving approximately 89% accuracy.
- Built an end-to-end NLP workflow covering preprocessing, tokenization, model training, validation, evaluation, and performance reporting.
- Created visual reporting outputs to communicate sentiment patterns, classification results, and model behavior.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Jan 2022 – Jun 2022

Laurus Labs, Visakhapatnam, India

- Performed structured data validation, documentation review, and process verification within regulated pharmaceutical QA workflows.
- Reviewed process records, SOPs, and reporting templates to support data accuracy, audit readiness, and documentation quality.
- Identified inconsistencies in records and collaborated with cross-functional teams to improve reporting accuracy and data integrity.
- Supported operational compliance through quality checks, issue tracking, documentation control, and stakeholder communication.
- Applied detail-oriented validation practices to maintain trustworthy records and reduce downstream reporting inconsistencies.

EDUCATION

Stevens Institute of Technology

May 2026

Master's in Business Analytics & Artificial Intelligence | GPA: 3.51

Relevant Coursework: Data Management, Machine Learning, Data Mining, Web Mining, Multivariate Data Analysis, Optimization & Process Analytics

GITAM Deemed University

Bachelor of Pharmacy

CERTIFICATIONS & ADDITIONAL INFORMATION

AWS Certified Cloud Practitioner

Apple Search Ads Certification | Bank of America Investment Banking Simulation

Publication: UV Analysis of Ritonavir | Languages: English, Telugu
