PROFESSIONAL SUMMARY

Recent Master's graduate in Business Analytics and Artificial Intelligence with hands-on experience in data science, Python, SQL, machine learning, statistical analysis, forecasting, segmentation, recommendation systems, data visualization, KPI reporting, and AI-enabled workflow automation. Skilled in translating messy datasets into business insights, dashboards, and decision-support systems for product, operational, and financial use cases. Experienced with Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, Tableau, HuggingFace Transformers, LangChain, OpenAI API, and AWS fundamentals. Strong interest in revenue analytics, product strategy, operational performance, budgeting support, forecasting, optimization, and GenAI-driven data workflows.

TECHNICAL SKILLS

Programming & Querying: Python, SQL, R Exposure, Pandas, NumPy, Excel, Data Cleaning, Data Transformation, Data Manipulation

Data Science & Modeling: Statistical Modeling, Machine Learning, Predictive Modeling, Forecasting, Segmentation, Optimization Models, Clustering, Classification, Recommendation Systems, Collaborative Filtering, Model Evaluation

Business Analytics: Revenue Analytics, Product Analytics, Operational Performance Analysis, Financial Planning Support, Budgeting Support, KPI Development, Growth Opportunity Analysis, Root-Cause Problem Solving

Visualization & Reporting: Power BI, Tableau, Matplotlib, Plotly, Data Visualization, Dashboard Development, KPI Reporting, Business Reporting, Stakeholder Reporting

AI & Automation: GenAI, LLMs, LangChain, OpenAI API, HuggingFace Transformers, BERT, NLP, Pinecone, RAG-style Workflows, Workflow Automation, AI-Assisted Analysis

Data Workflows: Reusable Modeling Frameworks, Data Pipelines, Data Validation, Data Quality, Structured Data, Unstructured Data, Documentation, Reproducible Workflows

Cloud & Tools: AWS Cloud Practitioner, Git, GitHub, FastAPI, Streamlit, Jupyter Notebook

PROJECT EXPERIENCE

Revenue, Product & Operations Analytics Case Study

- Built a business analytics framework to track KPIs across revenue, product usage, operational performance, budgeting, and forecasting scenarios.
- Designed SQL-style analytical datasets to support dashboard reporting, trend analysis, segmentation, and performance-driver identification.
- Created Power BI/Tableau dashboard concepts for leadership visibility into growth opportunities, revenue performance, operational bottlenecks, and strategic decision-making.
- Developed forecasting and segmentation logic to identify patterns, explain performance changes, and support prioritization of high-impact business opportunities.
- Documented metric definitions, reporting assumptions, data quality checks, and analytical workflows to improve clarity for non-technical stakeholders.

Netflix Recommendation System Optimization

- Built a collaborative filtering recommendation model using a movie ratings dataset to analyze user-item behavior and improve recommendation relevance.
- Performed data cleaning, exploratory data analysis, feature engineering, model evaluation, and reporting using Python, Pandas, NumPy, and Scikit-learn.

- Applied segmentation and behavioral analysis to identify engagement patterns and recommendation opportunities.
- Created dashboard-style reporting outputs to summarize product insights, recommendation performance, and business decision opportunities.

Formula 1 Strategy Analysis using Clustering

- Extracted and analyzed 3 seasons of Formula 1 race data using the FastF1 library to identify operational strategy patterns.
- Built Python workflows for data ingestion, cleaning, preprocessing, feature engineering, exploratory analysis, and structured reporting.
- Applied K-Means clustering to segment race outcomes into 3 strategy profiles and identify performance trade-offs across teams.
- Translated complex race data into actionable insights around operational decision-making, performance drivers, and strategy optimization.

NovaMind – Multi-Agent AI Decision Intelligence Platform

- Built a multi-agent AI platform using Python, LangChain, and OpenAI API to analyze incidents and generate structured decision-support reports.
- Designed workflows for data ingestion, evidence extraction, root-cause reasoning, issue categorization, and report generation.
- Used GenAI and LLM-based workflows to automate analysis, improve reporting consistency, and translate ambiguous problems into actionable insights.
- Created reusable analytical workflows that support root-cause problem solving, operational analysis, and stakeholder-ready reporting.

Rationale Agent – AI Incident Intelligence System

- Developed an AI-assisted IT operations tool using Python and LangChain for incident reasoning, diagnostic reporting, and structured analysis.
- Built workflows to parse unstructured incident information, recognize patterns, identify gaps, and produce human-readable diagnostic reports.
- Focused on improving data accessibility, analytical trustworthiness, workflow automation, and operational issue resolution.

Twitter Sentiment Analysis using BERT

- Fine-tuned a BERT Transformer model on 1.6M tweets for sentiment classification, achieving approximately 89% accuracy.
- Built an end-to-end NLP workflow covering preprocessing, tokenization, model training, validation, evaluation, and performance reporting.
- Used HuggingFace Transformers to develop, evaluate, and interpret sentiment classification results.
- Created visual reporting outputs to communicate sentiment trends, model behavior, and business-relevant insights.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Jan 2022 – Jun 2022

Laurus Labs, Visakhapatnam, India

- Performed structured data validation, documentation review, and process verification within regulated pharmaceutical QA workflows.
- Reviewed process records, SOPs, and reporting templates to support data accuracy, audit readiness, and documentation quality.
- Identified inconsistencies in records and collaborated with cross-functional teams to improve reporting accuracy and data integrity.
- Supported operational compliance through quality checks, issue tracking, documentation control, and stakeholder communication.
- Applied detail-oriented validation practices to maintain trustworthy records and reduce downstream reporting inconsistencies.

EDUCATION

Stevens Institute of Technology

May 2026

Master's in Business Analytics & Artificial Intelligence | GPA: 3.51

Relevant Coursework: Machine Learning, Data Mining, Data Management, Multivariate Data Analysis, Optimization & Process Analytics, Web Mining

GITAM Deemed University

Bachelor of Pharmacy

CERTIFICATIONS & ADDITIONAL INFORMATION

AWS Certified Cloud Practitioner

Apple Search Ads Certification | Bank of America Investment Banking Simulation

Publication: UV Analysis of Ritonavir | Languages: English, Telugu
