PROFESSIONAL SUMMARY

Data Science and Business Analytics graduate student specializing in statistical analysis, machine learning, data pipelines, and large-scale data integration. Experienced in Python and SQL for ETL development, data wrangling, and building production-ready analytical solutions. Proven ability to translate complex datasets into actionable business insights for technical and non-technical stakeholders.

EDUCATION

Stevens Institute of Technology, Hoboken, NJ — M.S. Business Analytics & Artificial Intelligence (Expected May 2026)

Relevant Coursework: Machine Learning • Experimental Design • Multivariate Analysis • Optimization • Web Mining • Data Management

TECHNICAL SKILLS

Programming: Python, SQL, R

Data Analysis & Statistics: Pandas, NumPy, Statistical Analysis, Hypothesis Testing, Probability, A/B Testing

Machine Learning: Regression, Classification, Clustering, XGBoost, LightGBM, scikit-learn

NLP & Generative AI: BERT, Transformers, RAG pipelines, spaCy, LLM applications

Data Engineering: ETL Pipelines, Data Integration, Data Cleaning, Data Wrangling, PostgreSQL

Visualization & Apps: Tableau, Power BI, Plotly, Streamlit

Cloud & Tools: AWS SageMaker, GCP Cloud Run, Git, Docker (basic), Airflow (basic)

PROJECT EXPERIENCE

- 1 F1 Race Strategy & Predictive Analytics — Built end-to-end data pipeline and gradient-boosted models (~82% validation accuracy); delivered Tableau dashboards for stakeholder insights.
- 2 Twitter Sentiment & Customer Analytics (BERT + RAG) — Designed automated NLP pipeline, improved accuracy by ~12%, and deployed real-time Streamlit monitoring app.
- 3 LLM-Based Incident Intelligence System — Built reusable data processing pipeline and automated root-cause classification for operational teams.

INDUSTRY EXPERIENCE

Laurus Labs Ltd. — Quality Assurance Intern (Jan 2022 – June 2022)

- Developed SQL and Python workflows to extract, clean, and integrate large production datasets
- Performed statistical validation, anomaly detection, and data quality monitoring
- Conducted ad-hoc analytical investigations supporting process improvement initiatives
- Standardized QA data review procedures improving cross-functional reporting efficiency
- Collaborated with stakeholders to deliver actionable insights
