PROFESSIONAL SUMMARY

Business Analytics and Artificial Intelligence graduate with experience in cybersecurity-related data analysis, operational reporting, data validation, dashboard development, and analytical workflow optimization. Skilled in SQL, Python, Microsoft Excel, Tableau, Power BI, ETL workflows, relational databases, and business intelligence reporting. Experienced in gathering requirements, analyzing data sources, documenting technical workflows, supporting operational processes, and collaborating with cross-functional teams to deliver data-driven business insights and reporting solutions.

TECHNICAL SKILLS

Data Analysis & Reporting

Microsoft Excel, SQL, Python, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Reporting Queries, Statistical Analysis, Trend Analysis, Reporting Metrics, Data Validation

Business Intelligence & Visualization

Power BI, Tableau, Dashboard Development, Data Visualization, Business Intelligence Reporting, Performance Reporting, Analytical Reporting

Data Management & Databases

Relational Databases, ETL Pipelines, Data Warehousing Concepts, Data Integrity Management, Data Processing, Data Scrubbing, Data Quality Validation, Operational Data Management

Business Analysis & Operations

Requirement Gathering, Functional Specifications, Technical Documentation, Workflow Analysis, Process Optimization, Operational Reporting, Stakeholder Communication, Cross-Functional Collaboration, User Support

Cybersecurity & Data Operations

Cybersecurity Data Workflows, Incident Analysis Support, Data Governance Concepts, Secure Data Handling, Operational Risk Reporting, Data Integrity Monitoring

AI & Analytical Systems

Machine Learning, NLP, Clustering, Predictive Analytics, Decision Intelligence Systems, Analytical Workflow Automation

Tools & Platforms

Git, Streamlit, FastAPI, AWS (Basic), Version Control

PROJECT EXPERIENCE

NovaMind – AI Decision Intelligence Platform

- Developed an analytical decision-support system integrating structured workflows, NLP pipelines, and operational reporting logic
 - Built data processing, reporting, and analytical workflows to support structured business insights and operational analysis
 - Designed modular interfaces supporting real-time dashboards, reporting outputs, and workflow automation
 - Improved consistency and efficiency of analytical processes through automated data handling and evaluation pipelines
-

Rationale Agent – AI Incident Intelligence System

- Developed analytical workflows for operational incident analysis, issue tracking, and root-cause reporting
- Implemented structured data processing pipelines for evidence extraction, reporting, and operational analysis
- Supported troubleshooting workflows through modular reasoning systems and analytical reporting outputs
- Collaborated on workflow optimization and structured issue analysis processes

Historacle AI – Historical Intelligence Dashboard

- Built interactive dashboard workflows for organizing, analyzing, and visualizing structured datasets and reporting metrics
- Developed reporting interfaces supporting trend analysis, insight generation, and analytical exploration
- Created user-focused dashboards to improve data interpretation and reporting accessibility

Formula 1 Strategy Analysis using Clustering

- Applied clustering techniques to identify performance trends and operational strategy patterns from structured datasets
- Performed data preprocessing, transformation, feature engineering, and analytical evaluation using Python and SQL-based workflows
- Generated reporting insights and dashboard outputs supporting analytical decision-making and performance evaluation

Twitter Sentiment Analysis using BERT

- Developed NLP-based sentiment analysis workflows for structured text classification, reporting, and trend analysis
- Performed data cleaning, preprocessing, tokenization, embedding generation, and evaluation reporting
- Built dashboards and visualization outputs to communicate sentiment insights and analytical findings effectively

Netflix Recommendation System Optimization

- Conducted exploratory data analysis, forecasting, clustering, and reporting analysis to identify engagement and recommendation trends
- Built dashboard workflows and reporting outputs supporting analytical insight generation and business decision-making
- Performed structured data transformation and reporting evaluation using Python and visualization tools

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Laurus Labs – Visakhapatnam, India | Jan 2022 – Jun 2022

- Performed data validation, operational reporting, process verification, and documentation review within compliance-driven workflows
- Reviewed structured datasets and identified inconsistencies to support corrective and preventive action processes (CAPA)
- Assisted in operational documentation, workflow analysis, reporting support, and process optimization activities
- Collaborated with cross-functional teams to maintain data integrity, reporting accuracy, and operational standards

EDUCATION

Stevens Institute of Technology

Master's in Business Analytics & Artificial Intelligence | May 2026
GPA: 3.51

GITAM Deemed University

Bachelor's in Pharmacy
