Abhay Raj Gurram

Machine Learning Engineer | LLMs, Reinforcement Learning, Data
Systems | PyTorch | Applied AI & Intelligent Automation
Jersey City, New Jersey, United States

Summary

Graduate student in Business Analytics & AI, specializing in building and deploying advanced AI/ML systems. I transform complex data into scalable, high-impact business solutions through expertise in predictive modeling, natural language processing (NLP), and deep learning. Currently seeking a Summer 2026 internship to apply my skills in Data Science or Machine Learning. My hands-on experience includes developing a predictive model for Formula 1 race strategies, achieving >80% accuracy, building a hybrid recommender system that boosted engagement metrics by 20%, and fine-tuning BERT models for sentiment analysis. I am proficient in the full stack of data tools, from Python and SQL to AWS SageMaker and Streamlit. I am passionate about solving complex problems with data-driven intelligence. My unique background combines technical AI/ML skills with research publication experience. I'm open to connecting and discussing internship opportunities.

Skills: Python | SQL | Machine Learning | Deep Learning | NLP | Predictive Modeling | TensorFlow | PyTorch | AWS | Tableau | Data Engineering"

Education

Stevens Institute of Technology

Business Analytics and AI · (September 2024 - May 2026)

GITAM Deemed University

Bachelor's degree, Pharmacy · (June 2019 - April 2023)
