PROFESSIONAL SUMMARY

Recent Master's graduate in Business Analytics and Artificial Intelligence with hands-on experience in Python-based machine learning workflows, NLP, Transformers, clustering, model evaluation, data preprocessing, and analytical dashboard development. Strong foundation in NumPy, Pandas, Scikit-learn, Matplotlib, Plotly, and applied ML experimentation, with exposure to PyTorch, TensorFlow, CNNs, and Transformer-based models. Interested in model optimization, neural network inference, quantization, numerical accuracy testing, and efficient ML systems for edge AI deployment.

TECHNICAL SKILLS

Programming & Data: Python, SQL, NumPy, Pandas, Data Preprocessing, Data Cleaning, Feature Engineering, Data Transformation

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Classification, Clustering, Predictive Modeling, Model Training, Model Evaluation, Hyperparameter Tuning, Cross-Validation

Deep Learning & NLP: PyTorch Exposure, TensorFlow Exposure, Keras Exposure, BERT, Transformers, Tokenization, Embeddings, CNN Fundamentals, NLP Pipelines, Text Classification

Model Optimization Interests: Neural Network Inference, Model Optimization, Quantization Interest, Low-Precision ML Interest, Numerical Accuracy Testing Interest, Model Compression Interest, Edge AI Interest

Visualization & Tools: Matplotlib, Plotly, Power BI, Tableau, Streamlit, FastAPI, Git, Version Control, Jupyter Notebook

Research & Engineering Practices: Research Paper Review, Experiment Reproduction, Analytical Debugging, Documentation, Reproducible Workflows, Collaborative Problem Solving

PROJECT EXPERIENCE

Twitter Sentiment Analysis using BERT

- Developed a Transformer-based NLP classification workflow using BERT for sentiment analysis on social media text data.
- Performed text preprocessing, tokenization, embedding generation, model evaluation, and performance reporting.
- Built visualization outputs to communicate classification trends, model behavior, and analytical insights.
- Applied Python-based ML workflows using structured experimentation and reproducible notebook-based development.

Formula 1 Strategy Analysis using Clustering

- Applied unsupervised machine learning techniques to identify race strategy patterns and performance clusters from structured datasets.
- Conducted preprocessing, feature engineering, model evaluation, and clustering analysis using Python, Pandas, NumPy, and Scikit-learn.
- Built analytical dashboards and visualizations to compare performance segments, trends, and strategy outcomes.
- Translated model outputs into actionable insights supporting data-driven performance analysis.

NovaMind – AI Decision Intelligence Platform

- Built an AI-enabled decision support platform integrating NLP workflows, analytical pipelines, and structured reasoning outputs.
- Designed modular Python workflows for data processing, model-assisted analysis, evaluation, and real-time insight generation.
- Developed Streamlit-based interfaces to visualize model outputs, analytical summaries, and decision-support results.
- Improved workflow reproducibility through structured pipeline design, documentation, and modular implementation.

Rationale Agent – AI Incident Intelligence System

- Developed an AI-assisted analysis system for incident investigation, root-cause reasoning, and evidence-based reporting.
- Built structured pipelines for input parsing, analytical reasoning, hypothesis comparison, and output validation.
- Applied model-assisted workflows to support debugging, evaluation, and decision-ready reporting.

Netflix Recommendation System Optimization

- Conducted exploratory data analysis, clustering, forecasting, and engagement pattern analysis on structured entertainment data.
- Built Python-based workflows for data preprocessing, feature analysis, visualization, and recommendation insight generation.
- Created dashboard-style reporting outputs to summarize trends, user engagement patterns, and analytical findings.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Jan 2022 – Jun 2022

Laurus Labs, Visakhapatnam, India

- Performed structured data validation, documentation review, and process verification within regulated operational workflows.
- Analyzed records and identified inconsistencies to support corrective actions, reporting accuracy, and process reliability.
- Collaborated with cross-functional teams to maintain documentation quality, operational standards, and data integrity.

EDUCATION

Stevens Institute of Technology

May 2026

Master's in Business Analytics & Artificial Intelligence | GPA: 3.51

GITAM Deemed University

Bachelor's in Pharmacy

CERTIFICATIONS & ADDITIONAL INFORMATION

Apple Search Ads Certification | Bank of America Investment Banking Simulation

Publication: UV Analysis of Ritonavir | Languages: English, Telugu
