PROFESSIONAL SUMMARY

Recent Master's graduate in Business Analytics and Artificial Intelligence with hands-on experience in data analysis, SQL, reporting models, KPI dashboards, data quality validation, relational data modeling, and business intelligence. Skilled in Python, SQL, Pandas, NumPy, Power BI, Tableau, Scikit-learn, and stakeholder-ready reporting. Experienced in building analytical workflows that improve data consistency, accessibility, documentation, and decision-making for non-technical audiences. Strong interest in People Analytics, Recruiting Analytics, People Systems, workforce reporting, system improvement, downstream reporting, and product-centric data tools.

TECHNICAL SKILLS

Data Analysis & Querying: SQL, Relational Databases, Python, Pandas, NumPy, Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis

People & Business Analytics: People Analytics, Recruiting Analytics, Workforce Analytics, Recruiting Funnel KPIs, Candidate Pipeline Analysis, Time-to-Fill Analysis, Offer Conversion Analysis, Hiring Trend Analysis

Business Intelligence & Reporting: Power BI, Tableau, KPI Reporting, Dashboard Development, Reporting Models, Data Visualization, Stakeholder Reporting, Executive Reporting, Product-Centric Reporting

Data Modeling & Quality: Relational Data Models, Data Quality Tests, Data Consistency, Data Accessibility, Data Documentation, Data Lineage Awareness, Downstream Systems, Upstream Data Gaps, System Integration Awareness

Machine Learning & Statistics: Scikit-learn, Clustering, Classification, Forecasting, Recommendation Systems, Model Evaluation, Statistical Analysis, Pattern Recognition

Engineering Practices: Git, Version Control, CI/CD Workflow Awareness, Automated Testing Awareness, Modular Code, Agile Development, Documentation, QA Validation, Reproducible Workflows

AI & Cloud: LangChain, OpenAI API, HuggingFace Transformers, Pinecone, Streamlit, FastAPI, AWS Cloud Practitioner

PROJECT EXPERIENCE

People Analytics Reporting Case Study

- Built a People Analytics reporting framework to track recruiting funnel KPIs including applications, screening stages, interview progression, conversion rates, time-to-fill, and offer outcomes.
- Designed SQL-style relational data models connecting candidate, job requisition, recruiter, hiring stage, interview status, and offer outcome tables for consistent reporting.
- Created Power BI/Tableau dashboard concepts for hiring trend analysis, recruiter workload visibility, candidate pipeline health, and stakeholder reporting.
- Defined data quality checks to identify duplicate candidate records, missing hiring stages, inconsistent recruiter ownership, invalid dates, and upstream reporting gaps.
- Documented metric definitions, dashboard logic, and reporting assumptions to improve discoverability, trustworthiness, and usability for non-technical stakeholders.

Formula 1 Strategy Analysis using Clustering

- Extracted and analyzed 3 seasons of Formula 1 race data using the FastF1 library to identify operational patterns across tire strategy, pit stops, and race performance.
- Built Python-based data pipelines for data cleaning, feature engineering, exploratory analysis, and structured KPI reporting.

- Applied K-Means clustering to segment race outcomes into 3 strategy profiles and identify performance trade-offs across teams.
- Created analytical dashboards and visual outputs to communicate KPI trends, performance patterns, and strategy insights to non-technical audiences.

Netflix Recommendation System Optimization

- Built a collaborative filtering recommendation model using a movie ratings dataset to analyze user-item behavior and improve recommendation relevance.
- Performed data cleaning, exploratory data analysis, feature engineering, model evaluation, and reporting using Python, Pandas, and Scikit-learn.
- Developed dashboard-style reporting outputs to summarize engagement patterns, recommendation performance, and business insights.
- Translated raw user interaction data into structured analytical findings supporting product and decision-making use cases.

NovaMind – Multi-Agent AI Decision Intelligence Platform

- Built a multi-agent AI platform using Python, LangChain, and OpenAI API to analyze incidents and generate structured decision-support reports.
- Designed workflows for data ingestion, evidence extraction, root-cause reasoning, issue categorization, and report generation.
- Created structured outputs to improve visibility, documentation quality, analytical consistency, and stakeholder-ready reporting.
- Applied first-principles problem solving to translate ambiguous incident data into clear, actionable insights.

Rationale Agent – AI Incident Intelligence System

- Developed an AI-assisted IT operations tool using Python and LangChain for incident reasoning, diagnostic reporting, and structured analysis.
- Built workflows to parse unstructured incident information, recognize patterns, identify gaps, and produce human-readable reports.
- Focused on improving data accessibility, documentation clarity, and analytical trustworthiness for operational stakeholders.

Twitter Sentiment Analysis using BERT

- Fine-tuned a BERT Transformer model on 1.6M tweets for sentiment classification, achieving approximately 89% accuracy.
- Built an end-to-end NLP workflow covering preprocessing, tokenization, model training, validation, evaluation, and performance reporting.
- Created visual reporting outputs to communicate sentiment patterns, classification results, and model behavior.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Jan 2022 – Jun 2022

Laurus Labs, Visakhapatnam, India

- Performed structured data validation, documentation review, and process verification within regulated pharmaceutical QA workflows.
- Reviewed process records, SOPs, and reporting templates to support data accuracy, audit readiness, and documentation quality.
- Identified inconsistencies in records and collaborated with cross-functional teams to improve reporting accuracy and data integrity.
- Supported operational process compliance through careful documentation, quality checks, issue tracking, and stakeholder communication.

EDUCATION

Stevens Institute of Technology

May 2026

Master's in Business Analytics & Artificial Intelligence | GPA: 3.51

Relevant Coursework: Data Management, Machine Learning, Data Mining, Web Mining, Multivariate Data Analysis, Optimization & Process Analytics

GITAM Deemed University

Bachelor of Pharmacy

CERTIFICATIONS & ADDITIONAL INFORMATION

AWS Certified Cloud Practitioner

Apple Search Ads Certification | Bank of America Investment Banking Simulation

Publication: UV Analysis of Ritonavir | Languages: English, Telugu
