PROFESSIONAL SUMMARY

Recent Master's graduate in Business Analytics and Artificial Intelligence with hands-on project experience in AI/ML engineering, Python, SQL, machine learning, deep learning concepts, NLP, Generative AI, LLM workflows, RAG pipelines, model evaluation, dashboards, and AI-driven reporting systems. Built applied projects using Python, Scikit-learn, HuggingFace Transformers, LangChain, OpenAI API, FastAPI, Streamlit, Pinecone, and AWS fundamentals. Strong interest in designing, developing, testing, deploying, and monitoring scalable AI/ML applications that solve real-world business problems across structured and unstructured datasets.

TECHNICAL SKILLS

Programming & Querying: Python, SQL, Java Exposure, Pandas, NumPy, SciPy, Excel, Data Cleaning, Data Preprocessing, Data Transformation

Machine Learning: Machine Learning, Deep Learning Concepts, Scikit-learn, Model Training, Model Testing, Model Evaluation, Model Validation, Classification, Clustering, Forecasting, Recommendation Systems, Predictive Modeling, Feature Engineering

Deep Learning & AI Frameworks: TensorFlow Exposure, PyTorch Exposure, Keras Exposure, HuggingFace Transformers, BERT, Transformer Models, NLP, Computer Vision Awareness, Reinforcement Learning Awareness

Generative AI & LLMs: Generative AI, Large Language Models, LLMs, LangChain, OpenAI API, Retrieval-Augmented Generation, RAG, Prompt Engineering, Embeddings, Pinecone, AI-Assisted Workflows

APIs & Deployment: FastAPI, Flask Exposure, REST API Integration, Model Deployment Awareness, Model Monitoring Awareness, Docker Exposure, MLOps Awareness, Scalable AI Applications

Cloud Platforms: AWS Cloud Practitioner, AWS Fundamentals, Azure Awareness, GCP Awareness, Cloud-Based AI/ML Workflows

Analytics & Visualization: Power BI, Tableau, Matplotlib, Plotly, KPI Reporting, Dashboard Development, Data Visualization, Business Insights

Workflow & Collaboration: Git, GitHub, Version Control, Documentation, Problem Solving, Communication Skills, Cross-Functional Collaboration, Agile Awareness

PROJECT EXPERIENCE

NovaMind – Multi-Agent AI Decision Intelligence Platform

- Built a multi-agent AI platform using Python, LangChain, and OpenAI API to analyze incidents and generate structured decision-support reports.
- Designed LLM-based workflows for data ingestion, evidence extraction, root-cause reasoning, issue categorization, and report generation.
- Integrated Generative AI and RAG-style reasoning concepts to convert unstructured incident information into structured business insights.
- Developed modular Python workflows to support repeatable analysis, clear documentation, and stakeholder-ready AI-generated outputs.
- Applied problem-solving and communication skills to translate ambiguous operational issues into actionable recommendations.

Rationale Agent – AI Incident Intelligence System

- Developed an AI-assisted IT operations tool using Python, LangChain, and LLM workflows for incident reasoning and diagnostic reporting.
- Built workflows to parse unstructured incident data, recognize patterns, identify likely root causes, and produce human-readable reports.
- Applied model-assisted reasoning, output validation, and structured reporting to improve analytical trustworthiness and decision-making.
- Designed the system with API integration and deployment readiness in mind using modular Python components.

Twitter Sentiment Analysis using BERT

- Fine-tuned a BERT Transformer model on 1.6M tweets for sentiment classification, achieving approximately 89% accuracy.
- Built an end-to-end NLP pipeline covering preprocessing, tokenization, model training, model testing, validation, evaluation, and reporting.
- Used HuggingFace Transformers, Python, Pandas, and Scikit-learn-style evaluation workflows to analyze model performance.
- Created visualization outputs to communicate classification results, sentiment patterns, and model behavior to non-technical audiences.

Formula 1 Strategy Analysis using Clustering

- Extracted and analyzed 3 seasons of Formula 1 race data using the FastF1 library to identify operational and performance strategy patterns.
- Built Python workflows for data ingestion, cleaning, preprocessing, feature engineering, exploratory analysis, and structured reporting.
- Applied K-Means clustering to segment race outcomes into 3 distinct strategy profiles and identify performance trade-offs.
- Developed dashboards and visual outputs to communicate insights, trends, and model results clearly to stakeholders.

Netflix Recommendation System Optimization

- Built a collaborative filtering recommendation model using a movie ratings dataset to analyze user-item behavior and improve recommendation relevance.
- Performed data preprocessing, feature engineering, model evaluation, and reporting using Python, Pandas, NumPy, and Scikit-learn.
- Applied machine learning and data visualization workflows to summarize engagement patterns and recommendation opportunities.
- Translated raw interaction data into structured analytical findings for product analytics and business decision-making.

Cloud Data Modernization & AI Reporting Case Study

- Designed an end-to-end analytics workflow covering data ingestion, transformation, validation, modeling, reporting, and dashboard delivery.
- Built SQL-style relational data models and reporting schemas to improve data consistency, accessibility, and stakeholder-facing analysis.
- Created Power BI dashboard concepts for KPI tracking, operational reporting, trend analysis, and decision support.
- Defined data validation checks for missing values, duplicate records, inconsistent fields, invalid dates, and reporting anomalies.
- Applied GitHub workflow concepts including branching, pull requests, code reviews, modular code, and CI/CD fundamentals.

PROFESSIONAL EXPERIENCE

Quality Assurance Intern

Jan 2022 – Jun 2022

Laurus Labs, Visakhapatnam, India

- Performed structured data validation, documentation review, and process verification within regulated pharmaceutical QA workflows.
- Reviewed process records, SOPs, and reporting templates to support data accuracy, audit readiness, and documentation quality.
- Identified inconsistencies in records and collaborated with cross-functional teams to improve reporting accuracy and data integrity.
- Supported operational compliance through quality checks, issue tracking, documentation control, and stakeholder communication.

EDUCATION

Stevens Institute of Technology

May 2026

Master's in Business Analytics & Artificial Intelligence | GPA: 3.51

Relevant Coursework: Machine Learning, Data Mining, Data Management, Web Mining, Multivariate Data Analysis, Optimization & Process Analytics

GITAM Deemed University

Bachelor of Pharmacy

CERTIFICATIONS & ADDITIONAL INFORMATION

AWS Certified Cloud Practitioner

Apple Search Ads Certification | Bank of America Investment Banking Simulation

Publication: UV Analysis of Ritonavir | Languages: English, Telugu
